GAMSA · Gender-Affirming Medicines South Australia

Puberty blocker (GnRH analogue) log

For goserelin (Zoladex), leuprorelin (Lucrin, Eligard) and triptorelin (Diphereline) · gamsa.au/using

Key points These medicines work only if each dose is on time. Book the next one before you leave.

Use one row for each implant or injection, and bring this log to each appointment.

Good to know

- The Zoladex product information says not to miss or delay a dose. Book the next one before you leave.
- Bone health is checked while you are on a blocker. A heart tracing (ECG) may be needed if you have a heart rhythm condition or take medicines that affect heart rhythm.
- Tell your prescriber about low mood, or any skin rash with blistering or peeling.
- Eligard is kept in the fridge. At home it may be kept below 25°C for up to 8 weeks.
- Supply and PBS listings can change. Check gamsa.au/supply, and ask your pharmacist well before the next dose is due.

How often

Medicine	Usual interval
Zoladex 3.6 mg	every 28 days
Diphereline 3.75 / 11.25 / 22.5 mg	every 1 / 3 / 6 months
Eligard 7.5 / 22.5 / 30 / 45 mg	every 1 / 3 / 4 / 6 months
Lucrin Depot Paediatric 30 mg	every 3 months

From each product's Australian product information. Your prescriber sets your interval.

Based on gamsa.au: Using your medicine, Medicines, doses and formulations and Blood tests and monitoring.
