GAMSA · Gender-Affirming Medicines South Australia

Testosterone injection log: long-acting

Testosterone undecanoate (Reandron 1000 and other brands) · gamsa.au/using

Key points A nurse or doctor gives this injection at the clinic. Book the next one before you leave.

Use one row for each injection. Bring this log to each review, so your prescriber can match your blood test to your last dose.

My prescriber

Clinic _____

Phone _____

My pharmacy

Name _____

Phone _____

Next injection due

Due on _____ Booked for _____ Blood test on _____

Write in pencil, and update it after each injection.

Good to know

- A doctor or nurse gives this injection. It is not a medicine you inject yourself.
- It goes deep into the muscle at the side of the hip, very slowly, over about 2 minutes.
- Stay at the clinic for **at least 30 minutes** afterwards.
- Some ache at the site for a day or two is normal.
- **Blood test:** just before the next injection is due.

How often

1. **First injection**

about 6 weeks later

2. **Second injection**

then every 10 to 14 weeks

3+. **Each injection after that**

After the injection, tell staff **at once** about a sudden cough, breathlessness, chest tightness, dizziness or feeling faint. In an emergency call 000.
