GAMSA · Gender-Affirming Medicines South Australia

Oestradiol patch log

For anyone using estradiol patches (Estradot, Estraderm MX) · gamsa.au/using

Key points Change your patch twice a week. Write down each patch and where it went.

Use one row for each patch. Writing the site down makes it easier to rotate.

My change days _____ and _____

Good to know

- Change your patch **twice a week**, every three or four days. Most people pick two fixed days, such as Monday and Thursday.
- Estradot goes on the lower belly. Estraderm MX goes on the lower belly or the buttock. **Never** on the breast or chest.
- Use the next spot each time, and leave at least a week before using the same spot again.
- Press firmly for about 10 seconds, then run a finger round the edges. Fold a used patch in half, sticky sides together, before it goes in the bin.
- If a patch falls off, press it back on, or put a new one on a different spot. Keep your normal change days.
- **Blood test:** just before a new patch goes on, or as your prescriber asks.

Front **Back**

Spots 1 and 2: lower belly, Estradot or Estraderm MX. Spots 3 and 4: buttocks, Estraderm MX only. Keep below the dashed waistline. Spot numbers match gamsa.au/using.
